

The National Assessment of Educational Progress (NAEP) assesses science in two major dimensions: Fields of Science (Earth, Physical, and Life) and Knowing and Doing Science (Conceptual Understanding, Scientific Investigation, and Practical Reasoning). The NAEP science scale ranges from 0 to 300. Scales are created separately for each grade.

Overall Science Results for Wisconsin

- In 2005, the average scale score for eighth-grade students in Wisconsin was 158. This was not significantly different from their average score in 1996 (160).¹
- Wisconsin's average score (158) in 2005 was higher than that of the nation's public schools (147).
- Of the 44 states and one jurisdiction that participated in the 2005 eighth-grade assessment, students' average scale score in Wisconsin was higher than those in 29 jurisdictions, not significantly different from those in 10 jurisdictions, and lower than those in 5 jurisdictions.²
- The percentage of students in Wisconsin who performed at or above the NAEP *Proficient* level was 39 percent in 2005. This percentage was not significantly different from that in 1996 (39 percent).
- The percentage of students in Wisconsin who performed at or above the NAEP *Basic* level was 70 percent in 2005. This percentage was not significantly different from that in 1996 (73 percent).

Student Percentages at NAEP Achievement Levels

¹ Accommodations were not permitted for this assessment.

NOTE: The NAEP grade 8 science achievement levels correspond to the following scale points: Below Basic, 142 or lower; Basic, 143–169; Proficient, 170–207; Advanced, 208 or above.

Performance of NAEP Reporting Groups in Wisconsin: 2005

Reporting groups	Percent of students	Average score	Percent below Basic	Percent of students at or above Basic	Percent of students at or above Proficient	Percent Advanced
Male	50	160	29	71	42	6
Female	50	156	30	70	35	4
White	80 ↓	165	21	79	45	6
Black	10	120	77	23	6	1
Hispanic	6 ↑	133	62	38	13	#
Asian/Pacific Islander	3	153	39	61	33	3
American Indian/Alaska Native	1	‡	‡	‡	‡	‡
Eligible for free/reduced-price school lunch	25	137	56	44	18	1
Not eligible for free/reduced-price school lunch	74	165	21	79	46	6

Average Score Gaps Between Selected Groups

- In 2005, male students in Wisconsin had an average score that was higher than that of female students by 4 points. In 1996, there was no significant difference between the average score of male and female students.
- In 2005, Black students had an average score that was lower than that of White students by 45 points. In 1996, the average score for Black students was lower than that of White students by 50 points.
- In 2005, Hispanic students had an average score that was lower than that of White students by 32 points. In 1996, the average score for Hispanic students was lower than that of White students by 25 points.
- In 2005, students who were eligible for free/reduced-price school lunch, an indicator of poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 29 points. In 1996, the average score for students who were eligible for free/reduced-price school lunch was lower than the score of those not eligible by 26 points.
- In 2005, the score gap between students at the 75th percentile and students at the 25th percentile was 44 points. In 1996, the score gap between students at the 75th percentile and students at the 25th percentile was 39 points.

Science Scale Scores at Selected Percentiles

Scores at selected percentiles on the NAEP science scale indicate how well students at lower, middle, and higher levels performed.

The estimate rounds to zero.

‡ Reporting standards not met.

* Significantly different from 2005.

↑ Significantly higher than 1996. ↓ Significantly lower than 1996.

¹ Comparisons (higher/lower/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Comparisons across jurisdictions and comparisons with the nation or within a jurisdiction across years may be affected by differences in exclusion rates for students with disabilities (SD) and English language learners (ELL). The exclusion rates for SD and ELL in Wisconsin were 3 percent and 1 percent in 2005, respectively. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.

² "Jurisdiction" refers to states and the Department of Defense Education Activity schools.

NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for free/reduced-price school lunch and the "Unclassified" category for race/ethnicity are not displayed. Visit <http://nces.ed.gov/nationsreportcard/states/> for additional results and detailed information.
